

SHAGBAOR AGBER

SOFTWARE DEVELOPER | FULL-STACK
ENGINEER | WEB3 ARCHITECT

SUMMARY

I am a resourceful software developer with proven experience in building scalable backend systems and decentralized applications. I specialize in bridging Web2 and Web3 technologies and am passionate about enhancing the developer experience while ensuring high-performance and secure applications. My expertise in various programming languages and frameworks has enabled me to contribute effectively to complex projects

EXPERIENCE

Claadme

08/2024 - 11/2024

Senior Backend Developer

Company focused on social media platform development

- Played a pivotal role in building and optimizing APIs for a cutting-edge social media platform
- Enhanced performance and reliability of backend services to support a seamless user experience
- Collaborated with frontend teams to ensure APIs met evolving user needs

Mediconnect System Services

06/2023 - 04/2024

Back End Developer

Company specializing in medical technology services

- Enhanced application performance and user experience
- Developed a RESTful API that improved scalability and reduced latency
- Created a custom UI library that significantly increased developer productivity
- Refactored legacy code and optimized database queries

Better Life Nija

06/2022 - 12/2022

KEY ACHIEVEMENTS

• Winners – Agorand Regional Hackathon (Secuda)

Co-led the development of a decentralized identity and access control system providing end-to-end encryption and verifiable credentials

• Community Choice Award - Crypto Cities Hackathon (SkillProof)

Created a plug-and-play tool for freelancers to mint NFTs as proof of completed work, establishing a trustless work history

• Maintainer: AmongFriends Protocol

Maintained a protocol that enables peer-to-peer wagering without centralized control

• Maintainer: PyMajic

Developed a Python package providing convenient commands for Django project management

SKILLS

Python • JavaScript • TypeScript • Solidity • Bash •
Django • Django REST Framework • Next.js •
Wagmi • Hardhat • PostgreSQL • SQLite •
MongoDB • Ethers.js • RainbowKit • IPFS •
Gnosis Safe • The Graph • GitHub Actions •
Docker • Multisig Treasury • RPC Nodes

VOLUNTEERING

• Web3 Instructor – Sandlip Oasis

Mentoring aspiring developers on decentralized technologies and fostering blockchain adoption across tech communities
